

DIRECTORY OF COPPER AND COPPER ALLOY FABRICATORS (FIRST USE) (annual)

This directory provides a systematic global overview of companies and plants involved in the first use of copper. Hereby, “first use” refers to the production of semi-fabricated copper products using unwrought copper materials such as refined copper or direct melt scrap as raw material feed. First users are mainly semis fabricators that process refinery shapes into semi-finished copper and copper alloy products. The Directory covers wire rod plants, ingot makers (for castings), master alloy plants, brass mills, and electrodeposited copper foil mills.

The subscription price of the Directory is €400 for subscriptions originating from institutions based in ICSG member countries* and €800 for subscriptions from non-ICSG member countries.

The Directory is available in PDF and Excel formats.
